In the working world, drones are suitable for numerous applications, both indoors and outdoors. If a company wants to use drones, it must consider the legal regulations in addition to the technical requirements. With the EU Regulation (EU) 2019/947, which came into force on 31 December 2020, regulations and procedures for the operation of unmanned aerial vehicles have been uniformly regulated throughout the EU. To mark this occasion, the General Accident Insurance Institution (**AUVA**), the German Social Accident Insurance e. V. (**DGUV**) and the Swiss Social Accident Insurance Institution (**SUVA**) invite to the joint **online conference "Drones and their use in the world of work"**.

The aim of the event is to inform people who are involved in the (planned) use of drones in companies about the current status. Experts who accompany and research the use of drones for various applications will speak in lectures about the experiences they have gathered and answer questions from the online participants.

### **Target group:**

- Safety experts
- Safety officers
- Occupational physicians
- Managers, team leaders

### **Contents:**

- Registration and authorisation (normative and legal regulations)
- Training for drone pilots
- Types of drones (multicopters)
- Already proven in-house solutions

- Practical examples (for indoor and outdoor use)
- necessary security measures
